Education

Institute of Engineering and Technology

Bachelor of Engineering in Computer Science & Engineering

2023 – 2027

Dr. B.R. Ambedkar University, Agra

Relevant Coursework

- Data Structures & Algorithms • Database Management Systems • Computer Networks • Operating Systems
- Object-Oriented Programming • Cloud Computing • Internet of Things • Compiler Design

Experience

Amroha Police Cyber Security Internship Program 2026 (APCSIP2026)

Jun 2026

Cybersecurity Intern — in association with Shri Venkateshwara University

Amroha, Uttar Pradesh

- Completed an intensive cybersecurity internship (11–22 Jun 2026) authorized by the Superintendent of Police, Amroha, conducted in association with Shri Venkateshwara University.
- Applied email forensics, spoofing-detection, and digital evidence handling principles — including IT Act Section 67C guidelines — to support law enforcement cybercrime investigations.

Cognifyz Technologies

Jul 2024 – Aug 2024

Web Development Intern (Remote)

Nagpur, India

- Developed and styled responsive web pages using HTML, CSS, and JavaScript as part of structured task-based internship programme.
- Completed assigned front-end development tasks demonstrating understanding of DOM manipulation, layouts, and UI design principles.

CodSoft

Jul 2024 – Aug 2024

Web Development Intern (Remote)

Remote

- Built front-end projects using HTML, CSS, and JavaScript, focusing on responsive design and clean UI implementation.
- Delivered task milestones within a 4-week virtual internship structure, earning completion certification.

Projects

Email Header Analyzer (EHA): Forensic Email Investigation Tool

Jun 2026

Flask, React, Vite, Docker, Nginx, Render.com

- Built a web-based forensic tool enabling police officers to trace email origins, detect spoofing, and generate PDF evidence reports for cybercrime investigations.
- Implemented a dual-source IP geolocation system with confidence-scoring badges and automated mail-server provider detection for Gmail and Microsoft domains.
- Built and deployed a Dockerized full-stack application (Flask + Gunicorn backend, React + Vite + Nginx frontend) on Render.com, incorporating legal guidance referencing Section 67C of the IT Act.

PharmaGuard: Cold Chain Monitoring System

May 2026

ESP32, C++, Arduino IDE, DS18B20, OLED, ThingSpeak, IoT

- Designed and deployed an edge-to-cloud IoT system on ESP32 with a DS18B20 waterproof temperature probe for pharmaceutical cold chain monitoring.
- Implemented a real-time threshold alert system (2°C–8°C safe zone) with active buzzer and LED indicators for immediate breach notification.
- Integrated ThingSpeak cloud platform for live data visualisation and remote monitoring via HTTP; streamed sensor data continuously to cloud dashboard.
- Built a responsive web dashboard (HTML/CSS/JS) displaying live telemetry, event logs, and breach alerts for end-user monitoring.

Technical Skills

Languages: HTML, CSS, JavaScript, Python, C, SQL

Frameworks / Libraries: React.js, Bootstrap

Developer Tools: VS Code, Arduino IDE, Git, GitHub, Postman

Technologies / Platforms: Node.js, MySQL, PHP, ThingSpeak, Render.com, GitHub Pages

Core Concepts: Data Structures & Algorithms, OOP, IoT, REST APIs, Cloud Computing Basics

Certifications

Basics of Data Analytics — Physics Wallah × Microsoft

Apr 2026

Cloud Computing — NPTEL

2025

Web Development Internship — Cognifyz Technologies

Aug 2024

Web Development Internship — CodSoft

Aug 2024
